

PARINEETA EKHANDE

Portfolio | Github | LinkedIn | Email | 0616354518

EXPERIENCE

University of Amsterdam

Amsterdam, The Netherlands

Teaching Assistant for Research Design & Statistics Course.

Nov 2023 - Dec 2023

Managed Canvas, the student platform, ensuring effective management & functionality.

Evaluated and assessed student assignments of a class of 13 students.

Reboot Wellness

Gurgaon, India

Counselling Psychologist

May 2022 - Aug 2022

Led end-to-end development of 4 projects involving clinical survey design, data analysis (Excel/SPSS) & client reporting within the Employee Assistance Program (EAP).

Cross-functional collaboration with various teams for seamless integration of survey results into strategies for employee well-being.

PROJECTS

Currency Exchange Time Series Analysis

Tools: NumPy, Pandas, Seaborn, SKLearn, Git

Evaluated 10 years of EUR/USD, GBP/JPY & CHF/CNY data using wavelet transforms & regression. Identified declining volatility trends and varying noise patterns, providing insights into market stability and currency behavior

Customer Segmentation Analysis

Tools: NumPy, Pandas, Seaborn, SKLearn, Excel, Git

Applied K-means clustering to segment bank customers into groups based on four financial behaviors: Balance, Purchases, Credit & Payments. Achieved 96% accuracy in predicting customer segments.

Farmer's Market Analysis

Tools: SQL, Excel, Tableau, Git

Designed & developed a mock Farmer's market sales data to analyze trends. Built CTEs, temp tables, & window functions to calculate vendor revenue, product performance, purchase patterns, & basket analysis to identify product pairings. The analysis was visualized in Tableau.

Simulation Study of Neurons

Tools: NumPy, SciPy, Matplotlib, Brian Simulator, Git

Designed & implemented a biophysical neural network model simulation using Brian Simulator to analyze neuron signals across 33 experimental conditions. Analysed changes in chemical parameters using NumPy. Used SciPy for spectral analysis & color mapping of neuron signals. I visualised patterns with Matplotlib & used Git for collaboration across teams.

EEG Replication Study

Tools: MNE, Matplotlib, Numpy, Seaborn, Pandas, Statsmodel, JASP

Implemented the MNE package for Singular Value Decomposition (SVD) to extract EEG signals for single experimental trials. Conducted a linear regression analysis, revealing no evidence supporting the proposed relationship with Visual Encoding Time in n-back task.

PROFILE

Cognitive neuroscience graduate with hands-on experience in statistical modeling, data analysis, & end-to-end project development using Python, SQL, & visualization tools. Experienced in machine learning, time series analysis, and EEG signal processing.

Languages:

English (C2), German (B1), Dutch (A2)

SKILLS

PROGRAMMING LANGUAGES:

Python, SQL, JASP, SPSS

VISUALIZATION TOOLS:

Matplotlib, Seaborn, Tableau

STATISTICS TOOLS:

Pandas, NumPy, Statsmodels, SciPy, SKLearn.

OTHER: Git, MNE, Brain, MS Office

EDUCATION

University of Amsterdam

Amsterdam, The Netherlands

Master's in Brain & Cognitive Science (Cognitive Neuroscience)

Fergusson College

Pune, India

Master of Arts in Clinical Psychology
